Kære gæst,

Velkommen til Whisky og Rom Festival i Pressen.

Vi er glade for at se, hvor imponerende stor interesse der er for arrangementet, både blandt publikum og udstillere!

Vi håber, at I må få nogle gode timer i selskab med vores kyndige og entusiastiske udstillere, og ikke mindst med alle de gode gyldne dråber.

Der er mange gratis smagsprøver på standene og mange gode smagsprøver koster fra kun 10 kr. pr. smagsprøve, og de lidt bedre koster lidt mere. Der skænkes både 1 og 2 cl.

Rigtig god fornøjelse!

Bedste hilsner,

El Dorado er navnet på den sagnomspundne "forgylde by", som spanske eventyrene jagtede langs Sydamerikas kyster. Men - det også navnet på et af verdens fineste og mest prisbelønnede rommærker gennem mere end 300 år, El Dorado Rom.

El Dorado Rom fremstilles i British Guyana, der ligger i det nordlige Sydamerika. Her skaber det tropiske klima optimale vilkår for fremstilling af førsteklases sukker- og forædling af rom. Hertil anvender El Dorado et helt unikt destillationsapparat, bl.a. med flere typer pot stills, herunder de gamle "Single og Double Wooden Pot Stills". De er med til at give nogle helt unikke smagstoner

til rommen. El Dorado Rom er kendetegnet ved en stor balance samt en afrundet, blød og fyldig smag med et væld af smagsnoter. El Dorado Rom (også kendt som Demerara rom), er sin helt egen og der findes en række varianter, der kan tilføjes til enhver smag.

El Dorado angiver som noget særligt rommens minimumsalder på etiketten - altså "True Age" og ikke en "solera" eller "gennemsnitsalder". Det angivne år på en El Dorado flaske er dermed angivelsen af den yngste rom der indgår i det enkelte blend.

BOTRAN er en eksklusiv serie af fadlagret rom fra Guatemala, som fremstilles af førstepræmningen af sukkerroerne, som af de lokale kaldes "virgin honey". Førstepræmningen giver rommen dens helt særlige bløde karakter og afbalancerede smagsnuancer.

Et andet karakteristisk for BOTRAN rom er, at lagringen - modsat de fleste andre romproducenters - foregår højt over havets overflade i cirka 2.300 m højde. De kolde temperaturer medfører en meget langsom modningsproces, hvilket giver en langt mere kompleks karakter.

Samtidig bruger BOTRAN-familien en helt unik lagringsmetode, idet rommen som minimum lagres på 4 forskellige typer egetræsfade i modningsprocessen: 2 forskellige typer Amerikanske egetræsfade, Sherry-fade og Portvins-fade. Det giver en helt unik kvalitet og er ryggraden i BOTRAN's eksklusive serie af fadlagret rom.
